

Students Without Summer Programs Selected

## Instructional Management Program & Academic Communication Tool

Area of Concentration	Summer School
Source System(s)	IMPACT SIM Summer
Data Discrepancy	Students Without Summer Programs Selected
Definition	This metric identifies students who are enrolled in a Summer School and do not have a Summer Program selected in SIM Summer.
	Why is this important? In order to facilitate accurate district-level reporting of students who attend a Summer Program, each student enrolled in SIM Summer must have a Summer Program selected.
	<b>Note:</b> Students attending Summer Bridge (to include Summer Acceleration) will have their value automatically populated. School users will <b>not</b> be able to select /change these auto-populated values.

## **Mitigation/Resolution Process**

The following steps detail how to select a Summer Program for a student:

- 1. Using the Status Coordinator or Principal role, perform a search to locate and open the record of the student in question.
- 2. On the Student Demographics page, under the Overview tab, scroll down to the Summer Program panel.

3. Under the *Summer Program* panel, click the *Summer Program* drop-down, and select the applicable Summer Program for the student. Note that a student can be indicated as participating in one Summer Program only in SIM Summer.
