Introduction

Student Logger is a tool available in the Verify.net Incident Management module that allows you to view and create logs for students. Schools have the option to purchase the Student Logger tool directly from the vendor.

Home Page

Logging in and Features

To log into Verify.Net, go through the IMPACT homepage: <https://impact.cps.k12.il.us>.

Here you will use your CPS credentials to login. Once you are in Verify, you will click on the **Incident Management** tab and then click on **Student Logger**. This will take you to your **Student Logger** home screen.

Figure 1a- Logging into Verify

Verify.NET's Student Logger features a comprehensive home page with a large array of data and features. While it may seem overwhelming at first, each section is easy to use and identify.

The top part of the screen is the same as in the standard Verify.NET application. It contains the Search and Support functions and the main menu, which allows you to access any of the Verify.NET functions to which you are assigned.

Under the main menu, we find 2 important sections: **My Student Logs** and **My To-Do List**. **My Student Logs** displays a list of all the student logs available to you, as well as pertinent information such as the student name, log date and time, log code, log title, and the creator of the log. The list is sortable by any parameter (for instance, you can have all of the logs by the same creator sorted by alphabetical order).

To view a log, click on the paper icon under the **View** column to the right of the specific log you want to view. To attach a sub log to an existing log, click on the multiple papers with the plus sign icon in the **Attach** column. If you want to edit a log click on the icon with the paper and pencil under the **Edit** column.

Page size: 10 32 items in 4 pages

My To-Do List shows a list of items that need your specific attention. Just like in **My Student Logs**, however, you can sort the list by any of the columns (such as read/unread, log date, type, and student name), and drill down to specific information (such as student information). Clicking on the log title or date will take you to a detailed view of the log itself, where you can attach a sub log or edit the log.

Chapter 2

Student Information

Main Screen

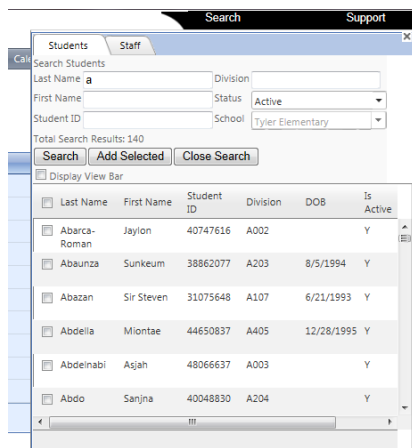

The **Student View** screen lists most of the important information for a specific student. At the top of the page you will search a specific student using the search tool.

Figure 2a- Student View Screen

If you are familiar with Verify.NET, you undoubtedly have used the **Search** feature to find students and staff members. If not, we will go over the basic search functions below. The Search function for the Student Logger area contains two tabs Students and Staff.

Figure 2b – Search Window (Student Search Tab)

The two standard **Search** window tabs (Student and Staff) are used to find students and staff members, respectively. The four text fields that you find in the Staff and Student tabs allow you to search for a whole name or a partial name, student or staff ID number, and division. Once the search runs, the names will be displayed in the lower part of the window, and students can be selected and added to the window that you're working on.

Once you have searched a student, the student's home and family information are listed, along with editable areas such as Adult connections or Service Provider. The student's teachers, administrators, and other related school officials are listed as well.

Below the student information box, you can view all of the student's current Log Entries. In this section, you can add a **New Log Entry** for this student (*see pg. 9*).

Figure 2c - Viewing the Student Information and Log Entries

The screenshot shows the Verify.NET interface. At the top, there is a navigation bar with 'Verify.NET' on the left, 'Welcome audra [Log Out] Change Unit' in the center, and 'Search' and 'Support' on the right. Below this is a secondary navigation bar with various menu items: Building Access, Discipline, Finance, ID, Textbook, Events, Calendar, Messaging, Reports, Setup, Truancy Analytics, and AIO Manager. The main content area has tabs for 'My Class', 'Student A-Z', 'Student Grade Levels', and 'Local Groups'. The 'Student Entries' tab is active, showing 'Choe, Adrea N/A (A335)'. There are 'Home' and 'Student View' buttons. Below the student name, there is a box with 'Choe, Adrea N/A (CPSID: 45834812)', 'Phone: (773) 403-4462', and 'Guardian Phone: (N/A)'. Further down, there are fields for 'Address: 7250 W Higgins Avenue', 'Guardian: N/A (N/A)', and 'Emergency Contact:'. Below these are 'Adult Connections: Grandma 773-555-5555' and 'Service Provider:' with 'Edit' buttons. A list of teachers is shown: 'Laera ABR SAYTIS, Kiay Arroyo Chavez, Arsean Espindola, Enan Kennix, Sage Kois, Lapresha Nathan, Eesle Posas, Sabaria Swiostek'. Below the student information is a section for 'Student Log Entries' with a 'New Log Entry' button and an 'Update Logs' button. A table of log entries follows, with columns for UID, Log Date, Code, Log Title, Creator Name, View, and Edit. The table contains 14 rows of log entries. At the bottom, there are navigation controls for the table, including 'Page size: 10' and '14 items in 2 pages'.

UID	Log Date	Code	Log Title	Creator Name	View	Edit
43552	1/2/2011 10:31:04 AM	BI-L	responding	Eesle Posas		
43552	1/2/2011 10:29:56 AM	BI-L	test notify	Eesle Posas		
43552	1/2/2011 10:25:50 AM	BI-L	test sublog	Eesle Posas		
43552	1/2/2011 10:22:48 AM	BI-D	test notify with dean support	Eesle Posas		
43552	1/1/2011 10:35:37 PM	BI-L	test	Lapresha Nathan		
43552	1/1/2011 9:08:11 PM	BI-L	test	Lapresha Nathan		
43552	1/1/2011 9:04:16 PM	BI-D		Lapresha Nathan		
43552	1/1/2011 9:04:15 PM	BI-D	test	Muntasir Smithstamps		
43552	1/1/2011 12:59:52 PM	BI-D	test notification with dean support	Lapresha Nathan		
43552	1/1/2011 12:58:55 PM	BI-L	Test notification	Lapresha Nathan		

As on the previous screens, all of the columns are sortable. Clicking on the **Creator Name** sorts the logs by who created them. Logs can be viewed, edited.

Student Logs

Creating New Logs

To create a log, you need to be on the Student View tab. From your home page you will click on **Student View**.

Figure 3a – Creating a New Log from the home page

On the Student Entries screen, use search to look up your student. Once you have selected your student, their **Student Information** will populate. If they have any previous logs those will display at the bottom of the page. To create a new log, click on **New Log Entry**.

Figure 3b-Viewing the Student page for a single student

The screenshot shows the Verify.NET interface for a student's profile. At the top, it says 'Verify.NET' and 'Current Unit: Tyler Elementary'. The student's name is 'Valentin, Masnah J (A309)'. Below this, there are tabs for 'My Class', 'Student A-Z', 'Student Grade Levels', and 'Local Groups'. The student's details include: Address: 7250 W Higgins Avenue; Guardian: Wisniewski, Joseph (Father); Emergency Contact: (blank); Phone: (773) 788-0916; Guardian Phone: (773) 788-0916 (Father). There are 'Edit' buttons for 'Adult Connections' and 'Service Provider'. Teachers listed are: Terriance Daguerra, Karlicia Dalip, Kevinnisha Filipovic, Arcyca Graves, Jenicel Mckire, Freddie Stefanek, Genielynn Tian, Gylisa Wilsonayers. Below this is the 'Student Log Entries' section with a 'New Log Entry' button and an 'Update Logs' button. A table of log entries is shown with columns: UID, Log Date, Code, Log Title, Creator Name, View, and Edit. The table contains 5 entries, all created by 'Mekada Gawle' with various codes like BI-D, Pos-, DA-Det, BI-L, and BI-L. At the bottom, there are navigation icons and a toolbar with options like '- Unread Log', '- Old Unread Log (older than two weeks)', '- Unread by Homeroom or Advisory Teacher', '- Read', '- Unread', '- Response or Sublog', '- View Log', '- Attach New Log', '- Edit Log', '- Search', and '- Edit'.

When creating the log there are two sections. The top section shows the typical Student Information box for all students that have been selected that we have seen in some of the previous screens. The bottom section which is the **Create New Log** section is filled with textboxes and dropdowns for detailed Log information creation.

Figure 3c- Creating a New Log

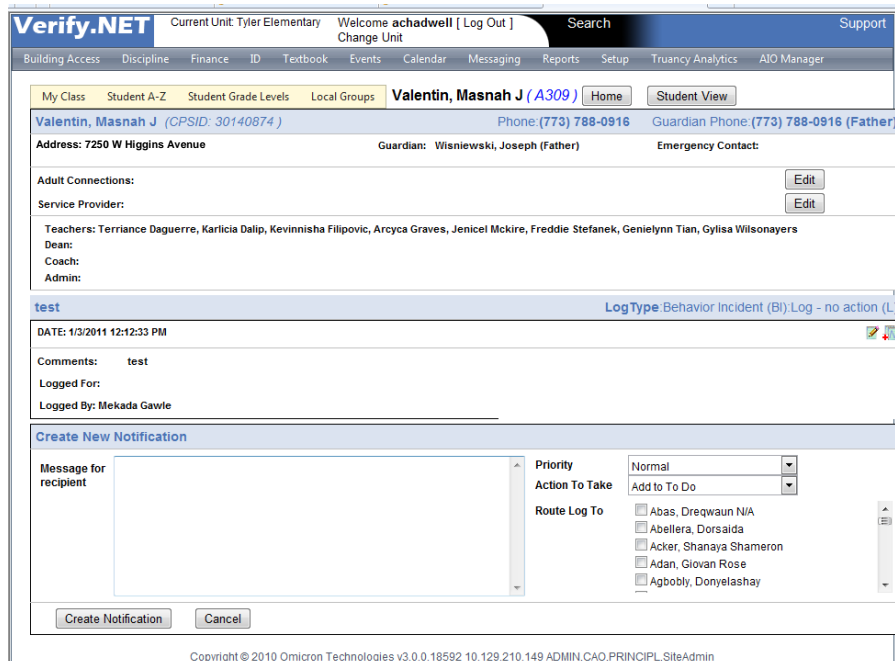

The screenshot shows the 'Create New Log' form in the Verify.NET interface. The student's name is 'Valentin, Masnah J (A309)'. The form has several sections: 'Log Type' (Behavior Incident (BI)), 'SubLog Type' (Log - no action (L)), 'Privacy' (You, All Teachers and Admin), 'Status' (Unread), and a checkbox for 'Hide Comments from Parent Printout'. There are textboxes for 'Short Title' and 'Comments', and a 'Public Groups' dropdown. At the bottom right, there are fields for 'Location', 'Date/Time' (1/3/2011 11:47 AM), and 'Co-Editor' (No One). At the bottom of the form, there are three buttons: 'Create Log', 'Create Log and Go to Notifications', and 'Cancel'.

Log Type and **Sublog Type** are dropdowns that allow you to decide what specific type of Student Log you are entering. The **Short Title** textbox dictates what you and everyone else will see at the top of the page or in a list of Logs on a screen. This is the main identifier of your Student Log.

The **Public Groups** box allows you to indicate to which groups the student belongs, and the **Comments box** is for detailed descriptions of the Log's contents. On the right of the box, we find **Privacy** and **Status** drop-downs, which allow you to set who is allowed to read the Log, and the Read/Unread Status, respectively. You are able to type in the **Location**, **Date/Time** and **Co-Editor** for the incident, if necessary.

Once you have filled out the appropriate boxes you can click **Create New Log or Create Log and Go to Notifications**. If you just click **Create New Log**, it will direct you back to your homepage where you are able to see the log. If you click **Create New Log and Go to Notifications** you will see your log that you created, and a new set of options will appear. Here you can type a message for a recipient and choose any other staff member that you would like to view this log. Once you have completed this information click **Create Notification**.

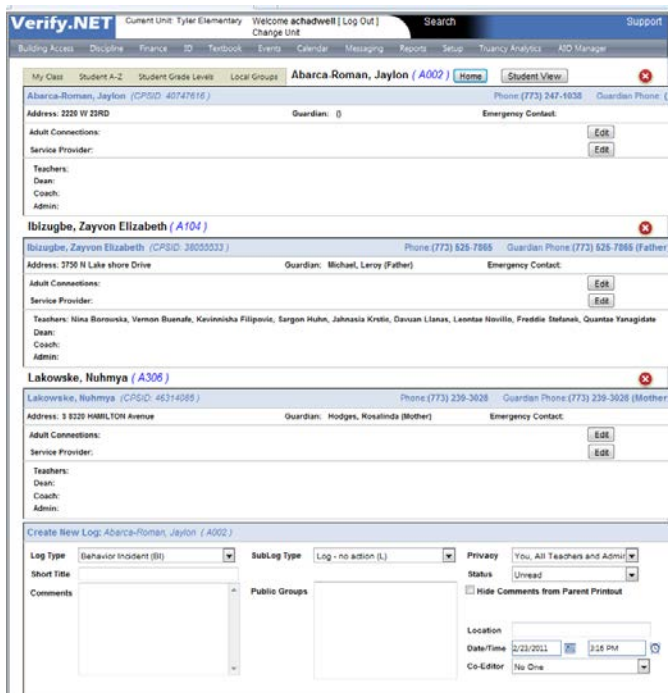

Figure 3d- Creating a Notification on a Log

Creating Multi Student Logs

To create a multi student log, go to Student View. On the Student Entries screen, use search to look up your first student. Once you have selected your student, their **Student Information** will populate. If they have any previous logs those will display at the bottom of the page. Then click on, **New Log Entry**. At this point you would then continue to use the search to look up your additional students. As you add students will you will notice the student information for each student will appear.

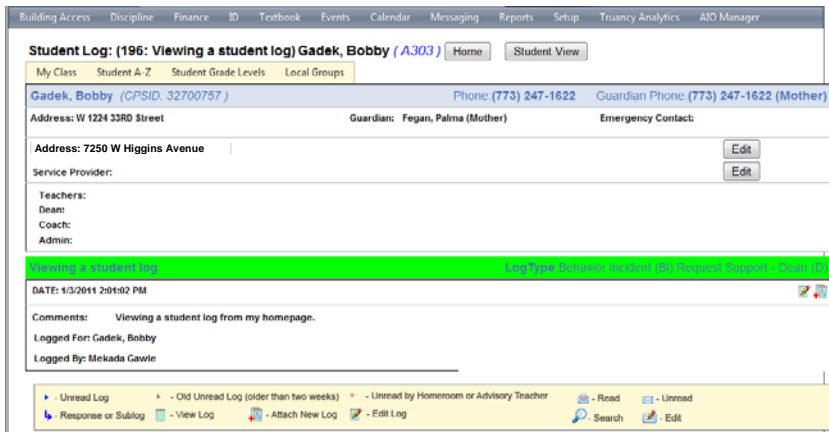

Figure 3e- Viewing the Student page for multi student

Viewing a Student Log

The Student Log information page has several areas. The first area is the Student Information area. Much like the upper area of the previous screens (3b), this box displays all of the student’s important information. The next section is the Student Log detail area. This box displays all of the information for specific Student Log, starting with the title in the Green title bar. On the title bar to the right, we will find the Log Type. Below the title bar, we find the rest of the information about the log, including date and location, buttons for editing the log and adding sublogs, and comments about the incident. Under the comments, the information about whom the log was created for and who created the log.

Figure 3f - Viewing Student Log detail area

Sublogs

Sublogs are typically responses or comments that have been appended to a specific Student Log by a staff member. Using the **Attach New Log** icon from the **My Student Logs** on the homepage allows anyone with the appropriate access to attach a sublog to an existing log. Sublogs are used to add follow-up information and requests to Student Logs.

Figure 3g.-Viewing Student Sublog
