

Instructional Management Program & Academic Communication Tool

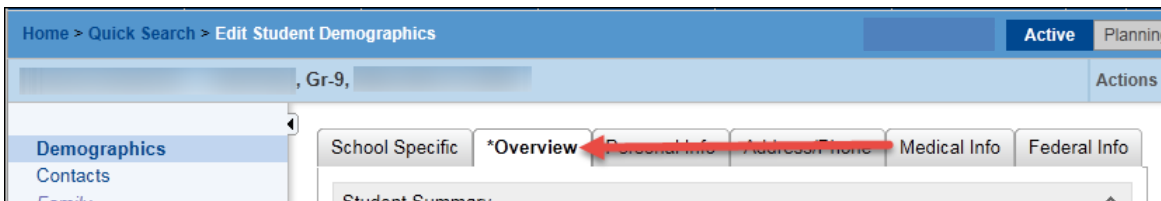

Students Without Summer Programs Selected

Area of Concentration	Summer School
Source System(s)	IMPACT SIM Summer: impact.cps.edu via the “Summer” tab 
Data Discrepancy	Students Without Summer Programs Selected
Definition	<p>This metric identifies students who are enrolled in a Summer School and do not have a Summer Program selected in SIM Summer.</p> <p>Why is this important? In order to facilitate accurate district-level reporting of students who attend a Summer Program, each student enrolled in SIM Summer must have a Summer Program selected.</p> <p>Note: Students attending Summer Bridge (to include Summer Acceleration) will have their value automatically populated. School users will not be able to select /change these auto-populated values.</p>

Mitigation/Resolution Process

The following steps detail how to select a Summer Program for a student:

- Using the Status Coordinator or Principal role, perform a search to locate and open the record of the student in question.
- On the *Student Demographics* page, under the *Overview* tab, scroll down to the *Summer Program* panel.

- Under the *Summer Program* panel, click the *Summer Program* drop-down, and select the applicable Summer Program for the student. Note that a student can be indicated as participating in one Summer Program only in SIM Summer.
