

Viewing Parent Portal PIN Information in IMPACT SIM

In order for parents/guardians to successfully access their student's data on the Parent Portal, they must create an account and enter a Personal Identification Number (PIN) to link their student to it. The PIN is a unique identifier for each student and provides an added measure of security to the parent portal registration process.

Effective for the 2015-16SY, each student's PIN is now available in SIM, as illustrated in the screen capture below. Note the following:

- The student's PIN is available immediately upon registration and enrollment of the student into the school.
- Adding Parent Portal PIN information in SIM will increase the number of school staff who will have access to provide this information to parents/guardians.
- School staff with the following SIM roles will have access to provide this information: Counselor, Grading Coordinator, Principal, Status Coordinator, Teacher, and TechCo.
